BANGOR DAILY WHIG AND COURIER.

BY SMITH & SAYWARD. THURSDAY, JANUARY 23, 1851. VOLUME XVII. NUMBER 175.

Bangor Daily Whig and Courier

IS PUBLISHED

Over the Kenduskeag Market, at Four Dollars a year, payable half yearly in advance. All subscriptions for less than a year to be paid in advance, and all orders for discontinuance must be accompanied by the amount due.

The BANGOR COURIER is published at the office of the Daily Whig and Courier, every Tuesday morning, at Two Dollars a year in advance or Two Dollars and Fifty Cents if not paid within six months from the time of subscribing.

☞ The publishers will not hold themselves responsible for any errors that may occur beyond the amount charged for the advertisement.

Mr. W. H. PALMER is agent for these papers. Advertisements left with him will be immediately forwarded. ☜

AYER'S

CHERRY PECTORAL

For the Cure of

COUGHS, COLDS, HOARSENESS, BRONCHITIS, WHOOPING-COUGH, CROUP, ASTHMA, AND CONSUMPTION.

In offering to the community this justly celebrated remedy for disorders of the throat and lungs, it is not our wish to trifle with the lives or health of the afflicted, but frankly to lay before them the opinions of those in whose judgment they have confidence, and whose statements will satisfy the most skeptical of its virtues. We do not claim for it the power of curing all the diseases to which the throat and lungs are liable, but we do claim for it the power of curing more of these diseases than any other medicine in use, and we do not hesitate to say that it will cure them more speedily than any other remedy. Many of the worst colds, coughs, and settled consumptions, which have been pronounced incurable, yield promptly to its influence, and are changed by it into the soundest health. Many of the cures wrought by it are publicly known in the communities where they have been performed, and where the parties are well and favorably known. Such publicity we have given to a few of the most remarkable cases that have come to our knowledge, not for the purpose of advertising them, but to furnish the reader with such evidence of the virtues of the Cherry Pectoral as will enable him to judge for himself of the propriety of trying it for his own complaint. We have abundant proof that it is the best remedy for children ever offered to the public, as it is pleasant to take, and never fails to cure the croup, or relieve the most violent whooping-cough. Indeed, we may say that it is the only medicine we can recommend with entire confidence to the community, as we know it to be reliable, and have no disposition to deceive anybody.

From the distinguished Professor of Chemistry and Materia Medica, Howdoin College.

Dear Sir: Believing I should receive the results of your preparation under the most favorable circumstances, I took an opportunity to test its virtues in my own family, of which the following is a statement:

I have now used with a high degree of gratification a number of bottles of your Cherry Pectoral, in my own family and among my children. I regard it as a safe and reliable remedy for Coughs and Colds, and especially for Consumption, which, in its early stages, it will surely cure. I have no hesitation in saying that it is the best medicine for the class of complaints for which it is recommended that has ever come under my observation.

Yours, truly, CHARLES THACHER, M. D.

Brunswick, Me., Feb. 5, 1847.

From an Overseer in the Hamilton Mills, in Lowell.

LOWELL, Aug. 10, 1849.

DR. J. C. AYER: I have derived great benefit from your Cherry Pectoral. I never had a cough, cold, or hoarseness, that it did not relieve immediately, and I never had the opportunity of recommending it but it gave satisfaction.

Yours, respectfully, J. P. EMERSON.

☞ Read the following, and mark if the medicine is worth a trial. This testimony has become very familiar, and the effect of the medicine was immediately evident:—

UNITED STATES HOTEL, Fishing Springs, July 5, 1849.

DR. J. C. AYER: I have been afflicted with a most distressing cough, for more than a year, and all the symptoms of confirmed consumption, for more than about four months, making me extremely weak, and unable to do anything. I was induced to make use of your Cherry Pectoral, and have taken two bottles, which have done more for me than all the doctors and all the medicine I have taken before. I am now able to ride out every day, and my cough is entirely gone. I feel like a well man, and owe my recovery entirely to your invaluable medicine.

Yours, truly, JAMES G. AYER, Practical Chemist, Lowell, Mass.

Prepared and for sale by J. C. AYER, Practical Chemist, Lowell, Mass.

For sale by Agents in the following places: Bangor, LADD & INGRAHAM, SARGENT & EMERSON, W. H. GUILD, and by W. WILDE, Brewer; Hancock, A. GUILD; Ellsworth, H. HALE; Machias, A. WOOD; Calais, Kendall & Whiting; Eastport, Deering & Shead; Portland, Stevens & Co., and by Druggists generally throughout the country. 1y20—Sawly

Apple Trees!

Persons Who Wish to Plant ORCHARDS

CAN BE SUPPLIED WITH TREES AT

Wyeth's Nursery,

At $150 per Thousand, and $20 per Hundred, or 25 Cents each for TREES

One Inch or more in Diameter, and from Six to eight Feet in Height.

THE NURSERY contains about Two Hundred Thousand Stocks, of all sizes chiefly Baldwin, and an assortment of other kinds.

Sewing by Machinery.

To Journeymen Tailors, Seamstresses, Employers, and all others interested in Sewing of any description.

SEWING attempts have been made to produce Machines for Sewing; but they were not well put into machine, and will be considered, and adapted to perform any kind of work, from the stitching of a fine cambric shirt-bosom to a ship's sail, as well as in the severest portions of winter. The needle is straight, and the table of the machine, affording room and opportunity to adjust the fabric in any way—and the stitch may be regulated to any length, even to a pin's breadth.

The stitch made by this machine is one which will not travel or open, and the sewing can only be taken apart by cutting every second or third thread. From 200 to 1600 stitches, according to the fabric operated upon, may be taken per minute.

To bring this machine to perfection, upon which I have been expending time, labor and money, and study have been exhausted, there is described a better Sewing Machine, for the public generally, and I will correspond, upon trial, with the recommendation hereto given.

The profit arising from the use of one of these machines, which are within the reach of every one in two cases, is from five to six dollars per day. The operation is not confined to the manufacture of clothing only, but may be applied to sewing of every description of linen, cotton, woollen, and most kinds of leather.

This machine, with ordinary care, is warranted to run one year without repairs, and will last from 5 to 10 years. And it is so simple in its construction and operation, that any person of ordinary ability may operate it.

The price of one of these machines, which is put up in a handsome and durable manner, is Fifteen Dollars, and will be sent to any part of the country. Orders for machines, (which will be carefully packed to go to any part of the world) with cash, or satisfactory recommendations, will be promptly attended to. All inquiries about terms, adaptation to different purposes, will be promptly attended to by the undersigned. All letters must be post-paid and addressed to

Wilder's Patent

SALAMANDER SAFES

90 STATE STREET,

Corner of Merchant's Row,

SECURED AGAINST GUNPOWDER

—And—

Warranted not to Injure Books or Papers by Dampness.

THESE are the only Safes (WILDER'S Patent) that have in every instance preserved their contents when exposed to large fires, like the burning of the Tribune building, in New York city, and many others too numerous to mention.

The above Safes are manufactured and for sale by JOHN B. WILDER, also, and for sale to Bangor, at the manufacturers prices, by

FISKE & DALE.

☞ The following letter from the Superintendent of the Maine Telegraph Company, is another proof of the superiority of JOHN B. WILDER'S Safe over all others.—

BANGOR, Oct 24, 1850.

JOHN B. WILDER, Esq.

Dear Sir—The Safe I purchased of you was exposed to a great degree of heat at the burning of the Telegraph Office, in this city. It was in the fire six hours; the books and papers were uninjured, and the damage to the Safe very slight, although it fell from the second story to the basement of the building. The little repairs necessary to the Safe have been made, and we shall not need to return it. It is still a good one yet.

Respectfully yours, JAS EDDY.

Oct 1, 1850. 16 6m

PATENTS.

American and Foreign Office.

AGENCY FOR BUSINESS

WITH U. S. PATENT OFFICE, WASHINGTON.

No. 22 State Street, Boston.

IN 1840 the subscriber was appointed by the Commissioner of Patents, Agent of the U. S. Patent Office, in accordance with the 10th Sec. of Act of '37.

Having relinquished the Agency for the transmission of Models, and adopted a more expeditious mode of sending them to the Patent Office, *whereby a Patent may be procured, and the usual delay*, he continues to forward them free of expense—to prepare Caveats, Specifications, Assignments, and all the necessary Papers and Drawings for Patents; and to render advice on legal and scientific matters respecting the same. Patents secured in Europe and other countries.

By application at this office, inventors may save the time and expense of a journey to Washington and delay there, as well as all personal interviews in obtaining their patents. They also have the advantage of *verbal explanations* with their inventions, and of consulting in respect to them, *matters of general and paramount importance in order to obtain a correct examination and decision*. The experience of several years' operation, an extensive collection of rare works of reference, &c., on mechanical subjects, the Patent Laws, and patents of different countries, collected at much expense during the long time this office has been established, together with documents here kept of inventions patented at Washington, enable by subscriber to afford to inventors, desirous of procuring Patents, assistance, and information which in other respects might be difficult of attainment.

H. R. EDDY, Solicitor of Patents.

WASHINGTON, JULY 21, 1849.—During the time I have occupied the Office of Commissioner of Patents, H. R. EDDY, Esq., of Boston, had business in the Patent Office as Solicitor, and from my intercourse with him officially, I have formed a favorable opinion of his character and attainments. There were few, if any, of the numerous Patent Agents, who had business before the Patent Office; and there were none who conducted it with more skill, fidelity and success. I regard Mr. Eddy as one of the best informed and most skillful Patent Solicitors in the United States, and have no hesitation in assuring inventors that they cannot employ a person more competent and trustworthy, and more capable of putting their applications in a form to secure for them an early and favorable consideration at the Patent Office. EDMUND BURKE,
Late Commissioner of Patents.

MRS. FOSTER'S

Dysentery and Diarrhœa

CORDIAL.

THIS great Vegetable Medicine has been thoroughly tested and proved to be the very best Medicine now in use, as a speedy cure, for Dysentery and Diarrhœa. We do not mean to say that it will cure the Cholera, but we do say that in the memorable season of 1849 this Medicine was administered with admirable success to persons who had every appearance of being attacked with the Cholera and it never failed of giving immediate relief. It has also proved decidedly beneficial to Children when teething.

This is a Medicine which every family should have; it not only cures the above complaints, but it is the very best remedy for Pain in the Stomach and Bowels; it regulates the Digestive Organs, restores the Appetite and gives new vigor to the Weak and Debilitated. It is also an excellent remedy for Colds and Coughs. Try it and you will find it to be all that it is recommended.

☞ Prepared by MRS. FOSTER, and sold Wholesale and Retail, at her residence, corner of French and Somerset Street, Bangor.

Also, at Blake's New Block, No. 61 State Street, H. S. HALL, Corner of Bridge's Avenue, and at SARGENT & EMERSON'S, No. 4 Smith's Block.

Littell's Living Age.

E. LITTELL & CO.,

Corner of Tremont and Bromfield Streets.

THIS work is conducted in the spirit of Littell's Museum of Foreign Literature, which was favorably received by the public for twenty years, but is it is twice as large, and appears so often that not only gives spirit and freshness to it, by many things which were excluded by a month's delay, but whilst thus extending its range and gathering a greater and more attractive variety, is able so to increase the solid and substantial part of his literary, historical, and political harvest, as fully to satisfy the wants of the American reader.

The elaborate and stately Essays of the *Edinburgh, Quarterly*, and other Reviews; and *Blackwood's* noble criticisms on Poetry, his keen political Commentary, highly wrought Tales, and vivid descriptions of rural and mountain Scenery; and the contributions to Literature, History, and Common Life, by the sagacious *Spectator*, the sparkling *Examiner*, the intelligent *Athenæum*, the busy and industrious *Literary Gazette*, the sensible and comprehensive *Britannia*, the solider and respectable *Christian Observer*; these are interwoven with the Military and Naval reminiscences of the *United Service*, and with the best articles of the *Dublin University, New Monthly, Fraser's, Tait's, Ainsworth's, Hood's*, and *Sporting Magazines*, and of *Chambers's* admirable *Journal*. He does not consider it beneath his dignity to borrow wit and wisdom from *Punch*, and, when he thinks it good enough, makes use of the thunder of *The Times*.

The steam ship has brought Europe, Asia, and Africa, into our neighborhood; and will greatly multiply our connections, as Merchants, Travellers, and Politicians, with all parts of the world, so that more than ever it now becomes every intelligent American to be informed of the conduct and changes of foreign countries. And the not only because of their heated contention with ourselves, but because the nations seem to be hastening, through a rapid process of change to some new state of things which the most political prophet cannot compute or foresee.

Geographical Discoveries, the frontiers of Colonization, (which is extending over the whole world,) and Voyages and Travels, afford favorite matter for his selections; and, in general, the editor systematically and very fully acquaints his readers with the great department of Foreign affairs, without neglecting our own.

Whilst the Living Age is desirable to all who wish to keep themselves informed of the rapid progress of the *amusements*—of Statesmen, Divines, Lawyers, and Physicians—of both Houses of Parliament—it will be found to be equally attractive and useful to their Wives and Children. It is, in fact, indispensable, because in the way of cheap literature, the best possible safeguard against the influx of what is bad in taste and vicious in morals, in any other way than by furnishing a sufficient supply of healthy character. The mental and moral appetite must be gratified.

By *winnowing the wheat from the chaff* by providing abundantly for the imagination, and by a large collection of Biography, Voyages and Travels, History, and more solid matter, a work is produced, well calculated, for universal popularity, and to raise the standard of public taste.

The excellent work is published every Saturday, by E. LITTELL & CO., *Boston*, who supply orders by mail from all parts of the country. For any term, and any sum to them, and they will send for a week the amount of Eight months reading in a large octavo pamphlet, of 18 pages, double column octavo,—price, 12½ cts.—or by the year, *Six Dollars*.

We add to our own recommendations, what our readers will value, infinitely more, a letter from the late Ex-President, J. Q. Adams:—

WASHINGTON, 27th December, 1845.

Of all the Periodical Journals devoted to Literature and Science which abound in Europe and in this country, this has appeared to me to be the most useful. It contains indeed the exposition only of the current literature of the English language, but this by its immense extent and comprehension includes a portraiture of the human mind in the most splendid portion of the present age.

J. Q. ADAMS.

Whig and Courier.

John S. Sayward, Editor.

THURSDAY, JANUARY 23, 1851.

☞ The Manchester (Eng.) Guardian, a paper having a watchful regard for the interest of English manufacturers, in speaking of the strong necessity which the report of the Secretary of the Treasury of the United States shows exists for a modification of the tariff, says very emphatically and significantly—'THANK GOD, THERE IS A HOUSE OF REPRESENTATIVES AND A SENATE.' And it argues but the point, to quiet the fears of the English manufacturers, 'that a majority of the House of Representatives and of the Senate are 'Democrats' who will not allow of any change in the tariff of 1846, however much such change may be desired by the President, and however strongly a necessity may be shown for a change by the Secretary of the Treasury;—these it says, do not alter the laws of the United States.—No, 'Thank God,' then cheats this organ of English manufacturers, that there is a majority of 'democrats' in Congress, and that they go for the measures of revenue which benefit English manufacturers and make business lively in Manchester, England, however it may be in the American Manchester or elsewhere.

We really wish that the mass of the American people, especially those true blue locos in the rural districts who do not have foreign interference and English monopoly, and who mean to cherish in their hearts true patriotism in a love of their own country—we wish all such could see these English papers and read what they say, and understand the reliance they place upon the locos in Congress to keep the tariff just where it is, for there it is favorable to English interest, and satisfactory to English manufacturers, those well fed men with broad checks, who are perpetually experimenting upon the sturdy laboring classes as to how much labor they can perform and how little consume.

The Manchester Guardian now before us, says that it ventured to predict, a year ago, that no change would be made in the tariff on account of the recommendation of Mr. Meredith, because it knew that a majority of Congress were 'democrats.' It now quiets the fears of its friends by assuring them that no change will be effected in the tariff, notwithstanding the strong desire of the President and the forcible argument of Mr. Corwin, because the democratic majority in Congress is larger now, than last year!

It admits that the arguments from the Treasury Department do cause a fuss in England, 'but the reliance upon the 'democratic' majority does not fail them, and all alarm is quieted!' In the very words of the Guardian, *'For our own part we are not afraid. We trust to the ascertained majority of both Houses of Congress, to prevent a retrogradation in favor of protection to the United States.'*

It is one of the strange things in our times that the leaders of the loco party should be so strongly in favor of a system of revenue which operates against the labor of our own people and in favor of British manufactures, while at the same time they would make the mass of their party believe that they are the genuine haters of whatever is English.

But it is not merely the inconsistency and strangeness of this matter which are worthy of deep and serious consideration but the more important and vitalfact, so well known and understood in England and throughout the Old World, that the present revenue system of the United States opens our markets to the manufacturers of the world, and depresses American labor and will result in a financial revulsion by and by, and which will be the more fearful and more swelled as that system is continued and the mountain of foreign indebtedness is piled up. What tiny man with a spark of patriotism should content to this, is strange beyond all else, because it does seem so very natural to take care of our own and so really meritorious and fair to encourage American industry rather than foreign industry. It is no worthy comment—not one for any man to be proud of—that the English manufacturers feel first rate because of the loco majority in Congress. The mass of that party had better learn speedily the position of their leaders on this subject of revenue.

☞ We understand now that the prospects of the Penobscot and Kennebec Railroad are very good. The Directors have assurances that the whole road can be built for about $1,350,000, certainly not exceeding that sum, and the Directors of the Atlantic and St. Lawrence road and the Kennebec and Androscoggin road have expressed their willingness to take a lease of the road for twenty years, paying six per cent. upon the sum for which it is known the road can be built.

When these arrangements are completed, and they are now in the process of completion, there can be no question as to the immediate progress of the road. There are contractors who are willing to take two hundred thousand dollars in stock and half a million of dollars in the bonds of the Company, leaving only about half a million dollars of stock, guaranteed to pay six per cent. for twenty years, to be disposed of by the Directors of the road. This stock is of a character to command the money, so that there will be no necessity of Bangor capitalists over-doing itself in reference to this road. It is bound now to go, and that without delay.

While the West is coming to Bangor, let Bangor see to it that she consults her own interest by investing her funds and directing her enterprise to those points which shall best enable her to take advantage of her position and to develop her resources and increase her business.

We wish there could be a thorough survey made of the resources of Bangor, resulting in a statement of the amount of manufactures which could be sustained here. Indeed, capital and labor should be continually making survey and testing the matter by experiment. The addition of a thousand or two men to the population of Bangor in new manufacturing enterprises—and this increase ought to be made and can be and will be, if our citizens are just to themselves—would effect great results and give an impetus to all other branches of business.

But it is hard withdrawing men from the lumber business, with its excitement, to engage in more quiet pursuits. We must wait for this, but every man keep an eye for some new enterprise, and when he has settled the subject and is satisfied with it, let him be suitably encouraged by capital and this push his enterprise at once and profitable issue.

Popular Lectures.

The Committee of the Mercantile Association give notice in our columns that a course of popular Lectures to be delivered before that body, at the City Hall, commences next Thursday evening, January 30th.

The names of the Lecturers attending have been secured, and it is understood that the Committee have been writing, and uncommonly successful, for a course of popular and instructive lectures could be had in the country. This course of lectures, generally, is a larger amount of matter than any course ever delivered in one season in this city. It is for the members of that Association and for the public to say whether it be satisfied and the Association with the course which they have undertaken. Certainly, so far as the lecturers are concerned, the Committee have secured, the essential of excellence, the essential of the lectures delivered before the Mercantile Associations in New York and in Boston, and before the Lyceums in New England.

This is the first effort the Association has made to furnish a course of lectures, and they have taken hold with a will and with the determination to make a course of able lectures which shall be a credit to the enterprise. These lectures, with the course which has just closed, have not only been a source of able lectures which have been able to give to our people, so that the suspension will not be felt for the present season.

The Railroad.

To the Editor of the Whig and Courier.

So it is in your paper of the 14th inst. a communication which must extend the road to Old Town, and the bridge, and expecting your friends and others. To remedy these difficulties I take the liberty to suggest the following plan. Erect a depot for freight at some point between the City Point and the Bangor bridge, across the Penobscot river, and four passenger station at some convenient place on the Kenduskeag, between the City Point and the place where the old Theatre stood; thence follow the valley of the Kenduskeag through Levant to Corinth; cross the County road a little north of the burying ground on West Corinth, from thence follow the valley of the "Pine Stream" and Kenduskeag, by Cutler's Mills, Stevens' Mills, and Libby's Mills in Exeter; thence follow the same valley, passing south of Henry Dearborn's in Corinth, and striking the flat land between the Alder and Dexter streams in Corinth, south of Scott's Mills to Palmyra, till the line intersects the line already surveyed to Waterville. When there can be a branch from the "Iron Works" and "slate quarries" in Plymouth, conveniently passing through Dover and Garland, and unite with the main line between East and West Corinth, by the route recommended by Geo. T. Clark, the Engineer of the Waterville and Bangor Railroad. Accompanied is a map with the route which I have now marked out, as also the location and situation of the city and all the villages and milling establishments, together with other interests on the route. I think in point of interest to the road when completed, that no other route can be found so advantageous to the stockholders, or one where the road can be built so cheap, by thousands of dollars, especially when we consider the enormous expense of building a railroad from the city point by your wharves down to High Head,—including the land damages. It is true the line I have marked out is a few miles longer than some of the lines already surveyed, but when we take into the account the vast amount of freight that passes from this city to Moosehead Lake, and that by adopting this route you are building some twenty miles of road in a direct line towards that place, and considering the amount of freight that would come from the interior of this county alone to your city, I think any one who shall view the route will be satisfied that this is the plan for the road.

G.

Agricultural School.

The subscriber will give his first lesson on Agricultural Geology, Chemistry, and Philosophy, on Saturday evening, 25th inst., at the Lyceum, at the bridge, and expecting many of your citizens and others.

MARTIN MOWER.

The above notice has been handed us for publication, and we cheerfully give it a prominent place, as a communication of interest to the community at large. It is a bold but much needed movement to have opened in an agricultural community an agricultural Free Evening School, yet this enterprise the two gentlemen named in the notice, have engaged. They are both competent instructors, and we cannot doubt that they will have a large and enthusiastic school.

Mr Mower has been for some years actively engaged in applying the principles of chemistry to practical farming, and has met with great success in the composting of manures and in providing food for plants. His crops and his profits have been largely increased, and he is now engaged in carrying his improvements to the feeding of his stock, and which promise the happiest results. Dr. Marston is a man of science, and a very thorough, practical farmer.

It is an honor to these gentlemen that they are willing to devote themselves to the labors and responsibilities of teaching a large class of young farmers in the science and practice of agriculture, and thus preparing them to go forward understandingly and successfully in their noble profession of tilling the soil.

☞ The "Gower Patch" announces that the affairs of the Hungarian Refugees has been finally settled. America has offered them an asylum which they have accepted, and has undertaken to provide for their wants; the Ottoman Government pays their expenses to Liverpool, and the English Government their expenses the rest to America.—America was proposed by the Ottoman Government and accepted by her England and America.

☞ The steamship Franklin from Havre, brought two million dollars worth of foreign manufactures. The Ark brought a large and rich cargo, and every steamer comes with rich freights of foreign manufactured goods. The American people consume largely, but the pay day must by and by come.—Better live more within ourselves and consume more of our own productions, and less of foreign make.

☞ We have received from E. F. Duren & Co. the January number of the Mother's Magazine and Family Journal. It is embellished with an engraving of the Natural Bridge, Virginia, and is illustrated with several spirited wood engravings of the finish.

☞ The January number of Mrs. Whittelsey's Magazine for Mothers and Daughters has been received in this city and may be found at Dorcy's.

☞ Under Mr. Vinton's provisional list last session which makes the House consist of 232 members, each one of California and the Territories, the ratio of representation will be about 94,000 for each constituency.

☞ The correspondence relative to the Conley prisoners, called for by Mr. Benton, will show that they were released at the request of Mr. Webster.

☞ Letters from Rome announce that the United States residents in that city have resolved on resistance to Pius IX. in order to close their chapel within its walls.

☞ It is stated that an Archæologist has lately discovered among the archives at Chartres, ninety-two original letters of the Kings of France, from Francis the First to Louis Eighteenth.

☞ The Louisville Journal says that D. W. Hopkins, sheriff of St. Clair County, Illinois, is a defaulter to the amount of 17,000 dollars, and has left for parts unknown.

☞ Mr. Mallory, Democrat, has been elected U. States Senator from Florida, vice Yulee, by votes of Whigs and dissatisfied Democrats.

☞ The Virginia Congressional Delegation are unanimously in favor of Daniel S. Dickinson for the next President.

☞ Gov. Lowe has pardoned Richard J. Turner, the defaulting Bank clerk.

WASHINGTON, Friday, Jan. 17.—It is by no means probable that the present disturbances in Central America will necessarily invoke any difficulty between the United States and Great Britain. The interference of the British government in the pending difficulties will not imply any intention permanently to occupy, forcibly or colonize, or assume, or exercise, any dominion over Nicaragua, Costa Rica, the Mosquito Coast, or any part of Central America.—Great Britain is not prohibited by the Clayton and Bulwer treaty from fulfilling all the obligations of her treaties of alliance and protection with any of those States, but she is prohibited from erecting and maintaining any fortifications and from permanent occupancy, and from exercising dominion in those States. Great Britain does not pretend to assume any exclusive rights in regard to the territory through which the canal may pass. I do not see that the British government were compelled by the treaty to withdraw their protection, but this seems to be the view entertained, in some quarters, and even by some Senators.

There was quite a city-like row here yesterday.—The streets, though wide, were hardly ample for all who pervaded them. There was a fire company here from Philadelphia, and they were received with due honors by our city companies. Fighting in the streets Philadelphia fashion, was a part of the program. They commenced fighting before the front portico of the President's House, to show their democratic inclinations. But the diversion was continued during the day and evening along Pennsylvania avenue. I suppose that for the credit of this day, the whole affair will be suppressed by the newspapers here. I saw a man picked up and carried into Willard's, shot through the lungs. He was standing in front of the hotel, as any one might have been, and had nothing to do with the row.—[N. Y. Journ. of Com.

SEAMEN'S DISASTERS ON THE WESTERN WATERS. The annual statement of the Marine Disasters on the waters of the South and West shows that during the year 1850, there were 53 vessels totally lost; of which 33 were sunk, 14 burned, and 5 destroyed by explosion. The number of accidents was 117. The number of persons killed was nearly 700, and probably half that number were wounded. The amount of capital destroyed from these accidents exceeds $1,500,000. The chief disasters befell the steamers. Griffith, Belle of the West, Anthony Wayne, Antoinette Douglass, Knoxville and Anglo-Norman. The number of lives lost by these six disasters was nearly 450.

SAD MISFORTUNE.—Mr. William H. Bradford, a member elect of the House of Representatives from Plymouth, and a member of the last House, met with an accident a short time since. While splitting wood, the axe glanced and cut a severe gash in his foot, rendering him unable to get out. The first of last week he started for the city, by railroad, in order to take his seat in the House, which he was anxious to fill, and proceeded a short distance on his way, when he became deranged, and was obliged to return. On arriving home, he exclaimed that he was ruined for this world, and rushed out of the house through the garden to a small stream that flows by it, into which he plunged. He was seen by some of his neighbors, who ran to rescue him and saved his life. On Saturday he was sent to the Hospital at Worcester. Mr. Bradford has a wife and four children, is an honest and upright mechanic, a worthy citizen, and was respected by all who know him.—[Boston Courier.

To the Committee of the P. A. Society on Crops.

A statement of the manner of cultivating the land on which the crops were raised presented for premium by the subscriber in 1850:

Corn.—The land on which the corn was planted was broken up last Fall, cultivated and harrowed in the Spring, furrowed, twenty loads of old manure put in the hill. Rows 3½ feet apart, hills 3 feet apart. Put one table spoonful of plaster on the corn after it was dropped. Put ashes around the corn after the first hoeing. Amount of labor consumed, about 12 days. Amount of crop, 1023 bu.

Potatoes.—This land was cultivated the same in Fall and Spring as that of the corn. Put ten loads of green manure in the hill, put plaster on the hill after the potatoes were dropped, also put plaster on the potatoes after being hoed. Amount of crop, 195 bu. of sound potatoes. Amount of labor, about 12 days.

Wheat and Rye.—The land on which the wheat and rye was raised was corn land well cultivated in 1849, ploughed in the Spring, after having spread upon each acre about 12 loads of green manure. Crop of rye, 22½ bu. Crop of wheat, 22 bu.

Oats.—The oats were raised on a sandy loam soil, being pasture land for many years, without any additional manure, ploughed in the Fall and cultivated in the Spring. Amount of crop, 65 bu.

E. F. CRANE.

To injure a man's sight, there is nothing worse than wealth. Let a man draw a ten-thousand dollar prize and in less than a month he will not be able to recognize the man that used to go security for him.

SALE OF THE STEAMSHIP GREAT BRITAIN.

This steamship has at length been sold by the Directors of the Great Western Steamship Company to Mr. Patterson, the eminent shipbuilder, of Bristol, for the sum of £110,000, being the seventh part of her original cost. Mr. Patterson is now building, in the dock in which the Great Britain was built, a steamship for the Royal West India Mail Packet Company, and she will be six feet longer than the Great Britain.—[London Times.

INTERESTING MOVEMENT. Yesterday, General Shields called for official information respecting the Nicaragua question, which has given rise to so much speculation among politicians. We are happy to see the resolution passed, and we trust that the information which the Secretary of State is called upon to produce will dissipate all uncertainty, and bring us to a proper understanding of our relations with Great Britain. She may be assured that we will never yield one atom of our national right or our national honor.—[National Intelligencer, Jan. 15th.

LEXINGTON MONUMENT ASSOCIATION.—This association, created by an act of the last Legislature, has been organized by the election of the following officers, viz: President—Mr Jonathan Harrington, Vice Presidents—Gen. Sam'l Chandler, Philip Russel, Capt. J. S. Parker; Secretary—Wm. Stevens; Treasurer—Wm. Chandler; Directors—Sullivan Burbank, Chas. Hudson, Otis H. Dana, Benj. O. Wellington, A. W. Crownin shield, Benj. Rice, Benj. Fake. Mr Harrington is the last survivor of the battle.

INTERNAL AND EXTERNAL CHARITY.—The nature of a man's internal cannot manifest itself to the man except by the means of his external; and when it does so manifest itself, there is then a combat with his external. It especially manifests itself when a man examines himself, sees his evils, and confesses them from thought, and thinks of repentance, and then resists or rejects his evils, and strives to lead a new life.

If any one omits to do these things, his internal man is evil, but if he does them, it is good; for the Lord operates in the external man through the external, and since evil is then residing in the external, a combat ensues. For the spirits of hell, who are called the devil, are admitted into the external man, which is called the flesh; and the Lord combats them in the man, and if the man also fights on from himself he conquers; and in proportion as he conquers, room is made in his external for good spirits to enter; and thus he gradually becomes a new man, and is regenerated.

Whatever the internal man produces and presents to vision and sensation in the external, is called a sign. If charity exists in the internal it causes the man to reflect upon, and to have actual cognizance and knowledge of his evils, and so forth. If it has not this effect, his external is not a sign of charity, and it still be has a worshipful and pious external, it is not a sign of charity but it is external charity without internal charity, which is no charity at all.

New York Markets.

Jan. 21.

Cotton—easy; sales 1200 bales.

Flour—favor of buyers, but unchanged, 2000 barrels sold.

Wheat—steady, sales 1000 bushels Genesee $1.25

Corn—for yellow 66@67c; sales of 10,000

Provisions generally unchanged.

Albany Market.—Jan. 21.

Flour—quiet but steady.

Wheat—nothing doing, but holders are firm and apparently indifferent as to effecting sales.

Barley Malt—there is considerable inquiry for, partly speculation. Holders are selling small lots as wanted by the trade for immediate use, at $1 12, and sales of larger lots could be made at the same figure, but holders prefer to wait the opening of the river before disposing of their stock. In the street, what kinds of grain bring better prices, and Barley has advanced rapidly under small receipts.

Oats—sell readily at 35@36.

Corn—55@60

Barley—100@108

Rye—70@75, the latter figure repaid by maltsters for prime lots

Dressed Hogs—nothing doing, and in the absence of sales we would quote the market firm at $5@6 12 for good lots.

Heather has been cut!

C. P. FESSENDEN'S PERMANENT

WRITING ACADEMY open day and evening, at No. 74 Cornhill, Boston.

Terms—$1.50 for Gentlemen.—Ladies $1.00.

Cards marked to order. Perfect satisfaction guaranteed. d3m—sep 13,

☞ Human observation, even though well directed, has hitherto failed in discovering any composition whose virtues are comparable with the Amole, or vegetable shampooing compound, prepared and sold by William Hegle, 277 Washington st. Boston. The magical assistance its use furnishes in a dull razor, is a balsam of all irritation consequent on the process of shaving, and the cool, healthy feeling it imparts to the skin, are its popularly recognized advantages.

For sale in Bangor by LADD & INGRAHAM and SARGENT & EMERSON. jan 16—3taw

Foster's Mountain Compound, for the Hair,

far surpasses any other Compound for the Ladies' Toilet. It possesses qualities never before Combined. One bottle of it is worth more than its weight in California Gold. Its high reputation, both from discriminating individuals and the press universally, has established a reputation at once unparalleled for all diseases of the Scalp, Baldness and falling Hair, removing Dandruff, &c. Its unbounded success has brought forth numerous spurious nostrums, made ultimately only of Alcohol, which are hot and aggravating to the first cause, baldness, and very injurious. Beware of these quackeries!

The Mountain Compound is sought after by the elite and fashionable in all the principal cities of the Union, and is regarded the most nutritious article for giving great beauty, moisture, and richness to the texture of the hair, ever invented.

Ladies and Gentlemen, try it! We say try it!!

Sold by LADD & INGRAHAM, and A. P. GUILD, and Druggists every where.

☞ H. W. FOSTER'S written signature upon every bottle wrapper.

March 6, 1850. 3taw1d

Bliss' Compound Cod Liver Oil Candy.

Since the introduction of Cod Liver Oil into general use, a great desideratum has been to combine an article with the same medicinal virtues, *free from its disagreeable odor and taste*, which have rendered it a sealed book to thousands of persons who are suffering under severe affections of the throat and lungs. After a series of experiments, the proprietor has succeeded in combining the purest Cod Liver Oil, without its nauseous and repulsive taste, presenting it in a form by which it can be administered to the most delicate invalid without inconvenience. So pleasant is the fact that it may be administered to a child without difficulty.

The powerful curative principles of Cod Liver Oil, so manifestly certain in the relief and cure of Croup, Colds, Asthma, Bronchitis, Sore Throat, Influenza, and all diseases of the Throat and Lungs, being thus retained and combined with other healing and harmless ingredients, forming one of the most soothing Cough Remedies and reliable agents for staying the advances of Consumption that has ever been discovered.

☞ Beware of counterfeits. Call for Bliss's Compound Cod Liver Oil Candy, and observe his signature on every package of the genuine. Prepared only by B. K. Bliss, Druggist, Springfield, Mass. Price 25 cents a package.

For sale in Bangor by LADD & INGRAHAM.

BY THE LAST MAIL.

CALIFORNIA ITEMS.

The weather at San Joaquin had been very cold. They had plenty of ice and a biting atmosphere.

The want of rain was badly felt at the southern mines. It was calculated that $100,000 a day was lost by the unusual dryness of the weather.

Ships 'Drummond' and 'North Carolina' were about to leave for Panama, full of returning emigrants. The cry now is not 'still they come,' but 'still they go.'

At Panama they are making arrangements for having a public library.

The 'Western Star' is the name of a new paper started at Milwaukie, (Oregon) on the Williamette. It belongs to the Democratic school of politics.

Business of all kinds was active in Oregon. A vast number of vessels had gone into the rivers, several direct from the Atlantic States, loaded with merchandize, &c., others from California, for the purpose of buying lumber and produce—which makes a quick and ready market for all the products of Oregon.

The crops raised at the Mission of San Jose, and sold within the last two years, are such as to astonish even one inclined to be credulous. We are not at present prepared to give the statistics; but, suffice it to say that the results of farming there have well demonstrated the immense productiveness of this soil of this country, where the same can be properly irrigated.—[Pacific News.

From the San Francisco Bulletin, Dec. 14.

The business affairs of California are every day settling down to a substantial and permanent basis; and the natural workings of a healthy trade most inevitably correct the fluctuations and anomalies which have occasionally marked operations on the Pacific.

In the political world the main topic is the election of United States Senator. The real candidates are, we suppose on the Whig side, Col. Collier, and Marshal Douglass; and on the Democratic side, Col. Fremont, Judge Heydenfelt, Hon. Thomas J. Henley, and Col. Weller.

The health of the city is completely restored the clear and freezing weather of the last week having driven out the cholera with its train of diseases; though not until it had snatched away several prominent and valued citizens.

From the mining districts the accounts are generally satisfactory. The rains which have now fairly set in, though they have driven the miners from the river, will enable them to prosecute their operations in the 'dry diggings' with energy and success. The quartz mining receives more and more attraction daily; although it requires capital for its successful prosecution, and will prove more profitable to associated than to individual exertion.

At no period since the first drop of gold was picked up in race of Sutter's saw mill, at Colomo, have the mines been worked with so much energy as at present. What are termed the 'dry diggings' are now receiving the whole attention of the miners; the recent rains having enabled them to find sufficient water to wash the large quantity of earth thrown up during the late summer months. The emigrants of this year over the plains, have been mostly engaged in this mode of mining since their arrival, and their success has been fair, though not extraordinary.

In the neighborhood of Georgetown and Greenwood Valley, some hundreds of industrious emigrants, having erected winter quarters, were pursuing their labors with good average success.

From the Southern mines we have favorable accounts, which lead to the belief that the aggregate yield of the mines is nearly if not quite equal at the present time, to anything in their past history.

On Dutch Creek, and at Kelsey's, between Georgetown and Coloma, hundreds of log cabins have been built for shelter during the rainy season, each the habitation of three or four miners, who appear to meet with success in proportion to the industry and energy put forth.

Markets.

SAN FRANCISCO, Dec 15.

Domestics—The demand light; heretofore many have been used for lining houses, but in our improving country other articles are substituted, of a more substantial character.

Provisions—A still further decline, as the arrivals have been large.

Sugars—An abundant supply, and large arrival expected. Consequently low prices.

Liquors—No particular change to notice; the market very regular, except at auction, where but little judgment is exercised as to qualities.

Metals—No change to notice since our last; an ample stock.

Hardware—In fair demand, as wanting.—Miners' shovels have been sold high, but supplies having come forward, prices have declined.

ST. LOUIS, Jan. 21.

Another ballot has been had for U. S. Senator and Grier is not yet elected. He will be this afternoon, if not before. Sk Longfellow was nominated, and though voted for him to prevent an election. His name is now withdrawn. Great excitement prevails. Dispatches from Jefferson City announce that the democratic caucus, held last night, could not agree in joint session. This morning all the candidates were dropped except Grier and Benton, and it is stated that the next ballot will elect Grier. At this morning's ballot Grier had 77 votes, lacking only 2 of an election.

☞ At preliminary meetings of the leading locos in Washington, it has been agreed to run Gen. Cass for the Presidency and Gen. Houston for the Vice Presidency.

☞ Mr. J. Dorsey, of New Orleans, has drawn Power's Greek Slave at an Art-Union distribution in Cincinnati.

☞ The steamship Palmetto, in crossing the bar at Matagorda Bay, Texas, struck and went to pieces.

Congress.

WASHINGTON, Jan 21.

In the Senate, Mr Pearce presented a petition from the Regents of the Smithsonian Institute, asking that the surplus, $150,000, remaining after completing the building, be taken back into the treasury and added to the permanent fund now there, belonging to the Smithsonian Institute.

Mr Mangum offered a resolution directing inquiry into the propriety of a reorganization of the State Department. Adopted.

The French Spoliation Bill coming up, Mr. Seward argued in favor of the claims.

Mr Gwinn gave notice that to-morrow he would move to go into Executive session at an early hour on important business. Adjourned.

In the House, the Speaker called attention to the accumulation of business on the table, lying over from last session. This it was his duty to do, if the House intended to act on it. But he believed the regular order was to call for reports from the Committees, and trusted that they would be reported.

Mr. Boyd, Chairman of the Committee of Ways and Means, spoke of the state of the business, and said if members continued to make other special orders, and did not sustain him in making up the appropriation bills, the chances were such they would be lost, if the Committee were called on for reports upon all subjects.

The House proceeded to the consideration of business on the Speaker's table.

Numerous Senate bills were referred.

The House took up the table a resolution passed by the Senate on the last day of last session, preventing the assignment of land patents under the Bounty Law of September, until after location.

A debate took place on the Senate bill, authorizing the selection of land given for school purposes in place of those already granted, and which are worthless. Without disposing of the subject, the House adjourned.

DIED

In this city, this morning, after a short sickness with scarlet fever, Mr. William B. Harlow of this city, aged about 40 years.

In Bloomfield, Me., 6th, of consumption Martha, wife of Martin Flanders, 21.

In Naples, 17th inst, Mr. Isaac Gray, about 76.

In Biddeford, 17th inst, Mr. Charles Harmon, about 30.

In Rochester, N. H., 15th inst, Mr. James Chesley, aged 101 years, formerly of Portsmouth.

In Exeter, N. H., 15th inst, Capt. Samuel Lovell, 86.

In Newington, N. H., Mrs. Abigail Cotter, 47, wife of Mr. Mark Cotter.

Proposals for Stamps.

POST OFFICE DEPARTMENT,
January 16, 1851.

PROPOSALS will be received at this Department until the 4th day of March next for furnishing stamps for the use of the post offices in the United States for four years from the first day of April next, when ordered by the Department, of the following descriptions, viz:

The name of the office and State in circular form, cut from a solid block of hardened steel, and made in such manner as to admit of letters and figures to designate the month and day, with a thumb screw to keep such letters and figures in place.—Such stamps and the letters composing the same, to be of the same size as those now manufactured and in use. A turned mahogany handle of the same size to be properly fastened to said stamp. The name of the year abbreviated so as to contain but three letters each of the same size now in use, and to be cut from solid blocks of hardened steel. Figures, for the days of the month, from 1 to 31, inclusive, to be made of like hardened steel, and of the size last aforesaid.

Also, stamps with the words "paid" and "free," of the form of those now in use.

Also, stamps with figures denoting the rates of postage, and similar to those now in use.

All of the above stamps to be made of hardened steel.

The proposals must also contain separate bids for the circular stamp, with the months and figures.

Also, for each separate piece containing the month consisting of three letters.

Also for each separate piece for the days of the month.

Also, for complete sets of months and figures.

Also, for each separate piece with the words "paid" and "free."

Also, for each separate piece with the figures denoting the rates of postage. The making of the different sets will not, however, be given to different contractors, but the proposal for the whole which is deemed most favorable to the Department will be accepted. The Department reserves to itself the right to reject all proposals if the price is deemed extravagant.

Specimens of the various kinds of stamps required can be seen at the appointment office of the Department.

N. K. HALL,
jan 23—nsaw *Postmaster General.*

THE DAILY TRIBUNE

Is issued every morning except Sunday on a large sheet of fine white paper, forming a quarto pages of six columns each or about the size of the average Country Newspaper Almost every of these pages are now every morning the aggregate of Editorials, News and Miscellaneous being greater than of any other paper in America and greater than any but one or two in Europe, though its price is but half that of other first class Dailies in this Country and less than one fourth the cost of the oldest journals in England Two Evening Editions are issued to supply the latest news up to the hour when the copy must be mailed

THE TRIBUNE is edited in chief by HORACE GREELEY who has several able assistants in all matters pertaining to the Politics and Legislation of our own Country Its Foreign (Old World) Department is in charge of CHARLES A DANA, assisted by a corps of correspondents in London Paris Constantinople &c &c He Californian Intelligence is under the management of BAYARD TAYLOR Esq and the efficient corps of Reporters Neither expense nor effort will be spared to render its news from all quarters the most full reliable and graphic Its Commercial Financial Express Steamboat and Mail Departments are thorough and reliable as that of any other paper Price $5 a year in advance three months $1 25

THE SEMI WEEKLY TRIBUNE

Contains nearly all the news and very many matter of the Daily, except such as is of local interest or has been superseded by fuller and more exact advices into the Semi Weekly Tribune Terms of Subscription same also with the Daily Extra low rates for clubs Price $3 a year in advance 2 copies for $5 10 copies for $20

THE WEEKLY TRIBUNE

Is issued every Thursday morning, and contains most of the matter of the Daily Tribune for a week in such a shape as to furnish a complete and unabridged record of the events of the week Price $2 a year in advance 2 copies for $3 10 copies for $15 and a large number at the same rate

The Tribune is not yet quite ten years old but has obtained an aggregate circulation of not far from sixty five thousand copies—about twelve times that of any other five times that of any two and more than that of the next largest Journal in the United States and the paper is now printed in the course of each week for more than one million readers while its editorial influence is probably still greater than its circulation

☞ The New York Tribune has always been Editor and five publishers and gives employment to as many printers as all the printing offices in East Tennessee combined that is equivalent to a large village or a prosperous country town Its editorial rooms are in a building established not for the Tribune but here in the City of Rochester, we have often pitched or call out from a City, last Saturday twenty one more than twenty four hours, and to address one or more of the readers himself We are not, or proprietors, managers, book keepers, clerks, carriers, printers, proof readers and almost the devil We have literally been many hands in other one office, but we now are reduced to some dozen like any how.—*Rochester (Tribune) Times*

THE WEEKLY TRIBUNE ran 1851 Upon the merits of The Tribune it scarcely necessary to enlarge, known as the leading political journal of the world and as the leading public journal of the country and Press regard it as a journal the statements of which they have the highest confidence and to which they can safely refer.—*Pittsburgh (Penn.) Gazette*

☞ The Tribune appears in a new and beautiful dress and on an improved quality of paper It is now unsurpassed as well as the best printers and readers in the world.—*Albany (N Y) Evening Atlas, Keyport (N J)*

☞ The Tribune at present ranks as the very best newspaper in the world The London Times is a great paper but we have many weekly Journals in America that would suit us as this, and none of them are better, in many respects A among these few The Tribune is unrivaled, we have achieved, as is a matter of showing the immense amount of labor performed in the establishment with the intelligence of a single one readers some idea of the enterprise which newspaper proprietorship has attained At present our columns are filled with interesting matter as to fill the insertion But we advise each of our friends as are desirous of subscribing for a New York paper if they can afford it to take The Tribune.—*Worcester Spy and Democrat*

☞ Barring its political views which of course is not to our taste The Tribune is one of the best conducted newspapers published in this country Its paragraphs are short and it rarely misses a point.—*Tribune's (Cooperstown N Y) Journal*

☞ The New York Tribune appeared on Friday last in a new dress, and its enterprising proprietors have made it one of the most elegant journals in the world The Tribune has long been justly regarded as one of the best known, far and wide but its enterprising proprietors Taylor and their full quota to the success of The Tribune His reviews are written in the best possible style, and display a thorough acquaintance with the latest and ablest literature from every quarter of the globe In the list of its correspondents it has some of the ablest men of the country and the independence of its views and positions on the leading questions of reform now agitating the public mind, draw around it a host of supporters.—*Newcastle (Pa) Gazette* The Tribune is conducting its paper in the interest of no party or clique, but in the interest of the whole people of the whole country It is the fearless champion of every cause which it espouses, and its support is always given in such a manner as to command the respect of friend and foe alike Its course in politics is manly and independent, and it is always ready to do battle for the right, no matter what party may be in power It is the consistent friend of human liberty, the same generous supporter of all reforms, and the able and fearless advocate of the protective principle

THE

Great American Remedy

FOR Colds Coughs Asthma Whooping Cough Croup and all diseases of the Chest and Lungs has now been selling before the public and its reputation as we feel established both from credible and numerous testimonials of Physicians and from the universal satisfaction given by all who have used it. We do not hesitate to say that *for the second time since its introduction* it is now superceded the use of every other article issued for the same and hundreds of complaints. As a family medicine it can never be outdone. A double the usual dose at first will invariably vomit the child if the first stages of croup, and relieve and quiet it immediately. For quite a number of years it has been the favorite and universal remedy in all the cases named of one of the most celebrated and skilful physicians

Sold wholesale and retail by R K HARDY at No 3 Harlow Block Bangor, and by Druggists generally throughout the country All orders will be promptly attended to nov 15
